## SUMMARY

Self-motivated and team-oriented Information Systems graduate from the University of New South Wales pursuing my passion in a front-end-focused development career.

## SKILLS

- HTML5
- CSS3/SASS
- JavaScript
- React
- GitHub
- SQL
- Microsoft Office – Excel
- Figma

## PROJECTS

### Musicify

A Spotify “extension” website that adds more features to the music experience. Functions include recommending songs based on selected filters, a discover page that plays random songs from a chosen category.

- Developed with: React, SCSS

### MyWatchList

Browse through movies, tv shows and anime extracted from the TMDB and Jikan API. Ability to view additional information such as synopses and trailers and save desired media item to a “watch later” list.

- Developed with: HTML5, CSS3, JavaScript

### Weather and Study Companion

Displays weather of user’s location using Fetch API and plays corresponding ambient sounds based on current weather with a further feature of a Pomodoro-style study timer.

- Developed with: HTML5, CSS3, JavaScript
